Leaking of classified and personal information – demand for strong action thereof.

Sir,

Of late, it has become a habit by vested interests to release classified and personal official information in the social media. We are constrained to bring your kind notice that the yet-to-be-discussed proposals / suggestions of a committee on amendments to the R&P Rules in AAI is in circulation in Whatsapp, Facebook, email etc. Considering the destructive nature of the contents in this proposal, the executives performing safety critical jobs are highly disturbed. Interestingly, whosoever are committing this type of offence are going scot free. We have a reason to mention that lack of accountability is the order of the day in HR Directorate.

It is also pertinent to bring to your notice that all personal information for all executives and Boards Members like PMS grading, PRP amount etc. were in circulation in the social media before management took action on releasing the payment. In spite of our protest, no investigation was made to find out the source of leakage and deal the issue strongly as a deterrent measure. Inaction on the part of HR Dte. might have encouraged others to divulge classified information on R&P revision with an ulterior motive to vitiate the working environment. We have come under tremendous pressure to deal with this situation.

We all Associations demand stringent actions under major penalty against the persons involved in this type of activities in order to provide a deterrence for such illegitimate activities by persons occupying critical positions.

With warm regards,

(D.K. Behera)
President
