**Subject : Requirement of Extra Water Dispenser & Proper Cleanliness of existing water dispenser –
regarding**

Sir,

I would like to bring your kind attention towards water dispenser available in NATS Complex for ATCOs. Sir, it has been observed that Water dispenser available in Briefing, TWR and ACC are not cleaned from long time which shall be cleaned on regular basis. Since contamination of water is very easy if not cleaned time to time and may also leads to Stomach problems to ATCOs.

Since, Water is a very basic need and shall be available in easily accessible position and proper cleanliness shall be assured.

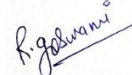

There is a only ONE water dispenser in ACC which is located in Locker room near sink. Since Sink is used by many to wash their tiffins , even some people spit in the sink, which makes the location of water dispenser very unhygienic , also the location is quite inaccessible from ACC West /FIC or even for new person looking for water dispenser here n there.

Sir, I therefore, request you for following points for immediate necessary action:

- 1) One committee shall be formed, which consists of member from all domains including ATC Guild which shall ensure Proper Cleanliness of Water Dispensers on regular basis and their Serviceability.**
- 2) Water Dispenser in ACC shall be relocated from present position to New location from where it shall be accessible to all users.**
- 3) A New water dispenser shall be installed in FIC , as there are rest rooms, TV room and Sports Area nearby. Need of water dispenser has been observed.**
- 4) Near all Water dispensers , a covered dustbin shall be placed. Also Disposable glasses shall be available all the time and responsibility of availability of disposable glasses shall be allocated .**

Thanking You

Regards

**(Richa Goswami)
Member, ATC Guild , NR**
